HISTORY

HISTORY

When Jesse Shwayder founded Samsonite® in 1910, travel was reserved for only an exclusive few, those who had the means to see the world. Given this exclusivity, travel was a high quality experience from the transportation, to the attention to service, to even the accessories used to carry one's belongings. As one of the original brands in travel, Samsonite has continued to leverage its craftsmanship and heritage as an innovator for the past 100 years, to create stylish and high quality solutions for the world traveller.

Today, Samsonite continues to lead the luggage category with the same core principles, further expanding Shwayder's vision globally with design and innovation into product categories and consumer targets.

By identifying trends and interpreting the continuing evolution of travellers' needs, Samsonite continues to lead the market with innovative, high quality and stylish designs. Now, thanks to the launch of Cosmolite® and Short-Lite™, the lightest Samsonite hardside and softside ranges ever, Samsonite establishes itself as the leader of lightness in the luggage industry.

CURV TECHNOLOGY

Ultimate combination of strength and lightness...
MADE IN EUROPE.

CURV MATERIAL - HOW IS IT MADE?

Made of 100% virgin polypropylene grains. These grains are melted into a thin sheet of polypropylene.

This sheet is cut into thin strips of about 1 cm wide.

The strips are then stretched 10 to 15 times to make them incredibly thin and strong.

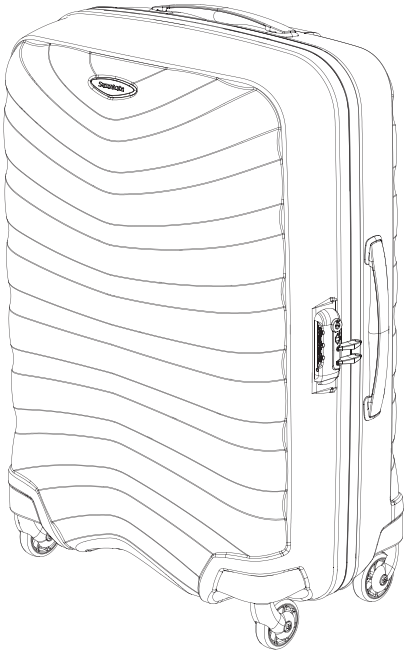

The strips are woven together, in the same way as cotton is woven. The end result is a layer of stretched and woven polypropylene fabric.

Several layers of woven polypropylene fabric are partially melted and hot compressed in order to form an incredibly light and strong sheet.

Made in Germany by Propex Operating Company, LLC.

Exclusive to Samsonite in the luggage market.

CABIN SIZE

Confused by cabin case rules?
Samsonite has the perfect case for you.

IATA recommends cabin luggage to have a maximum length of 56 cm, width of 45 cm and depth of 25 cm. These dimensions include all parts of the case, such as wheels, handles and side pockets. However some airlines may apply further restrictions on size and/or weight due to capacity limitations. Four dimension categories help you to find a suitcase especially for your needs.
